

# R360

## Copy Milling CUTTERS

NEW SIZES AVAILABLE  
FOR FACE MILLS & END MILLS  
IN 8MM & 10MM INSERT RANGE!

- Positive insert geometry enabling a smoother cutting action, resulting in better surface finishes
- Robust design with large chip gullets for an efficient evacuation of chips
- Ability to face, copy and plunge with the same cutter, thus allowing more versatility and fewer setups
- Integrated anti-rotation lock on 12 and 16mm inserts for more precise insert indexing
- Lower cutting forces at higher feeds
- Ideally suited for mold and die manufacturing
